

SAMSUNG

Galaxy Tab Active Pro

Exceptional performance in even the toughest conditions.

Pairing rugged durability with portable productivity, the Samsung Galaxy Tab Active Pro brings business to the most challenging of environments. The larger 10" screen gives more space to work, while Samsung Knox defence-grade security and the versatility of Samsung DeX lets you work the way you want, wherever you are. Built to withstand the toughest workplaces, it's the perfect device for dusty factory floors and the unpredictable conditions of outdoor work.

IP68 water and dust resistant.

With IP68 water and dust resistance¹, the Galaxy Tab Active Pro is built to withstand the most challenging environments. Use it in dusty conditions, such as an industrial factory or building site. And if you're working in the field in a downpour, your tablet is fully protected from the elements.

MIL-STD 810G Certification.

No need to worry about the Galaxy Tab Active Pro performing in challenging conditions. With MIL-STD 810G certification², the tablet is built to withstand the shock from a 1.2-metre drop with the cover attached—so it won't break should accidents happen in the loading bay or in the field.

Display.

The 10" screen on the Galaxy Tab Active Pro makes it perfect for when you need clarity while working in all elements and demanding conditions. With its larger screen, you can easily capture, view, share and transfer information on the move.

Samsung DeX.

Featured for the first time in a rugged tablet, Samsung DeX connects the Galaxy Tab Active Pro to a monitor with a single cable³ for a PC-like experience. No cable? No problem. Switch to DeX mode and use your tablet like a PC. Have multiple windows open, use drag and drop and right click for more functions. Productivity has never been so mobile.

mPOS.

Enable more seamless payments across the customer journey. With the Galaxy Tab Active Pro, frontline staff can check orders and stock levels in real time, as well as take on-the-spot payments to maximise your selling opportunities.

¹ Resistant to dust and up to 1.5 metres of fresh water for up to 30 minutes (IP68).
² When tested on a flat surface, without its protective casing can withstand a drop of up to 1 metre. Drop test results meet MIL-STD 810G standard.
³ USB-C to HDMI cable and accessories sold separately.

Galaxy Tab Active Pro

Technical specifications

Design

IP68 water and dust resistant¹
MIL-STD 810G Certification²

Display

10.1" WUXGA TFT 480nit
Wet Touch, Glove Mode

Memory

4GB + 64GB
MicroSD up to 512GB³

Battery

7,600mAh (Typical)⁴
User-replaceable
Fast Charging

Camera

Processor

Qualcomm SDM 670
(2GHz Octa-core)

¹ Resistant to dust and up to 1.5 metres of fresh water for up to 30 minutes (IP68).

² When tested on a flat surface, without its protective casing can withstand a drop of up to 1 metre. Drop test results meet MIL STD 810G standard.

³ MicroSD card sold separately. External memory can be used to store media (photos, video and music files), but not applications.

⁴ 7600mAh (typical) refers to the typical value of the battery capacity as tested under third-party lab conditions. Typical value is the estimated average value considering the deviation in battery capacity among the battery samples tested under IEC 61960 standard. Rated (minimum) capacity is 7400mAh. Actual battery life may vary depending on network environment, usage patterns, and other factors.

⁵ POGO Charging Dock sold separately.
