
Environmental Policy Statement

The aim of our environmental policy is to undertake a responsible business approach designed to minimise our impact on the environment.

We are committed to meeting and indeed exceeding regulatory expectations in terms of best practice environmental requirements.

Our primary goal is to strive for continual improvements with regard to our environmental management system in order to help prevent pollution and minimise waste creation.

We therefore seek to manage our processes, materials and staff in order to reduce the environmental impact associated with our site.

Key Points of Our Environmental Strategy:

- Remove, reduce, reuse and recycle raw materials, generated waste and packaging
- Reduce the environmental impact of the overall business
- Improve the efficiency of energy usage
- Continuous evaluation of operations to ensure that they are efficient thus minimising waste
- Actively promote recycling both internally amongst staff and externally amongst our customers and suppliers
- Source and promote product ranges which minimise environmental impact both in terms of production and distribution
- Meet or exceed all the environmental legislation that relates to the company

This Environmental Policy Statement is kept under regular review to ensure that we adhere to best practices at all times. Any changes and updates to the policy can be found on [this](#) web page. The policy was last updated January 2024, and authorised by:
