

## Dakota Secure Remote Access (DSRA)

### NHS/N3 Approved, High Speed, Secure Mobile Data SIMs for Healthcare

Dakota Secure Remote Access is a flexible IT solution that helps the NHS to provide patients with high quality, joined up services on any device, at any time, anywhere.

It makes relevant information available to the whole healthcare team, encouraging collaboration and reducing duplication of effort.

The end result is less frustration for patients and more effective and efficient healthcare provision.

**Average Data Speed of 25.9 mbps up/down**

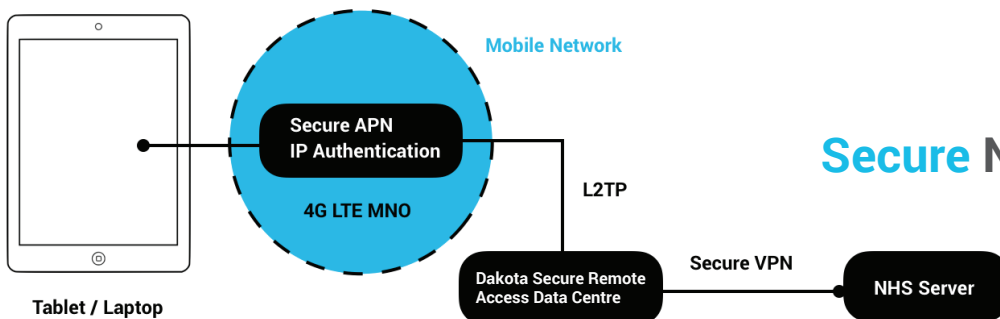

## Our Service
