

Recommended Products for Mission-Critical Healthcare Applications

PDA's & Handheld Computers

Designed for the rigours of healthcare environments, our recommended handheld computers & PDA's are built with medical-grade chemical-resistant materials, ideal for repetitive cleaning & sanitisation. With hot-swappable batteries, WiFi & Bluetooth provided as standard and the ability to allow access to timely, accurate & reliable data, these devices help to deliver enhanced patient safety & care.

Medical Grade Keyboards

Dakota's recommended keyboards are designed for constant cleaning with standard hospital-approved disinfectants. These hygienic keyboards are fully sealed and free of antibacterial coating, ensuring optimal infection prevention in the operating theatre, intensive care environment or wherever fluid incidents & bio-burden must be considered. The accompanying silicone drapes can be safely wiped, sprayed and steriised in an autoclave.

Workstation Connect Solution

Workstation Connect is a powerful solution that enables mobile computers & tablets from Zebra to be used as a workstation. Simply dock the mobile computer or tablet in the specialist cradle to mirror the device's display & functionality on a larger screen. Due the nature of the Zebra Workstation Connect solution, the need for dedicated workstations is eliminated.

All-in-One PCs

Designed for surgical & clinical review applications, our recommended all-in-one PCs are surgical-grade certified.

With chemical-resistant anti-microbial moulding, these units withstand constant repetitive cleaning with harsh disinfectants.

Developed with mobility in mind, medical-grade computers can be permanently wall-mounted or mounted on to specialist carts.

Desktop Barcode Printers

Featuring disinfectant-ready UV-resistant housing, our selection of recommended printers supports 1D & complex 2D barcodes required by GS1 standards & the Scan4Safety initiative. The high resolution printers are ideal for printing patient wristbands as well as the small labels required for specimen vials & laboratory slides.

With battery-powered options available, the compact size suits space-constrained areas & healthcare applications on the move. WiFi & Bluetooth connectivity options are available as standard.

Wristbands

Wristbands come in a multitude of materials, colours, shapes & sizes. Thanks to our years of experience within the healthcare sector, we are well-placed to advise you on the right choice for your specific application.

We have long-standing relationships with some of the industry's leading healthcare wristband manufacturers & offer a comprehensive range supplied either on cartridges for wristband printers or in rolls or on sheets for desktop printers, as well as a wide range of wipeable printing hardware designed specifically for healthcare applications & environments.

We can also help you to deploy patient wristbands which are fully-compliant with GS1 standards & the Scan4Safety initiative.

Speciality Labels for Healthcare Applications

Our recommended paper labels are available in a variety of sizes, with multiple adhesive options as well as direct thermal & thermal transfer formats to suit label lifespan requirements.

[View Media](#)

Medical Records

Medical records can be extensive & often disorganised. We provide case note labels compatible with a wide range of thermal transfer & direct thermal printers to suit your needs.

Pharmacy Labels

Thanks to our years of experience in pharmacy labelling, we are able to recommend a range of labels & printers which are built to provide solutions best-suited to pharmacy departments.

Slide Labels

Printing directly onto slides can be both expensive & unreliable. At Dakota, we provide labels that can be printed & applied to slides for clear sample identification, risk reduction & improved traceability.

Specimen Labels

We offer specimen labels in a variety of sizes to compliment NHS software systems including Meditech, Cerner, Dedalus (formerly Lorenzo), Clinisys (formerly Sunquest) & Epic Software.

Theatre Trays

Our high temperature label & ribbon combination can withstand autoclave sterilisation & is designed for easy attachment onto surgical trays.

Printer Ribbons

Print label quality & durability depends on the type of ribbon & label material. At Dakota, we recommend the best type of ribbon for the needs & environment of your team.

Medical Carts Solutions for Healthcare Applications

Dakota Healthcare is able to recommend fit-for-purpose innovative medical cart solutions designed for enhanced patient safety & care.

Designed with high-quality components to ensure continuous & reliable use, Dalen Healthcare's mobile carts are suitable for a range of solutions including secure medication & drugs trolleys for EPMA, all-in-one phlebotomy workstations, mobile EPR & video conferencing.

Built with anti-microbial, easy to clean & infection-control friendly materials, our recommended healthcare carts have height adjustment features, enabling your healthcare team to work comfortably & safely. Optional screen mounts can also be adjusted to remove obstruction from the patient's eyeline or to share information easily with colleagues.

[View Mobile Carts](#)

MediStation EPMA Drugs Trolley

Fully enclosed secure drawer & made-to-measure PC enclosure adheres to Security Level One standard, stores bottled & boxed medication, waist-height dispensing shelf.

Link Cart Tablet

Manual height adjustment, adjustable secure tablet bracket with swivel & tilt function, lockable castors & integrated USB smart charging.

Laptop on Wheels

Pneumatic height adjustment, chemical-resistant antibacterial worktop, on-board twin power socket & storage for power adaptor & mains cable.

Workstation on Wheels

Pneumatic height adjustment, integrated on-board battery, worktop-mounted battery power gauge, integrated charging circuit & on-board twin power socket.

MediCab

Electrically height-adjustable, antibacterial powder coat finish, chemical-resistant antibacterial worktop, single/double trays & lockable door.

MediCab Duo

Electrically height-adjustable, antibacterial powder coat finish, chemical-resistant antibacterial worktop, single/double height tray configurations & lockable door.

OmniCart

Fixed-height worktop, antibacterial powder coat finish, chemical-resistant antibacterial worktop, single/double height trays, lockable door with magnetic latch.

OmniCart Duo

Fixed-height worktop, antibacterial powder coat finish, chemical-resistant antibacterial worktop, single/double height trays, lockable door with magnetic latch.

Voice-Care

Voice-Care is a ground-breaking, hands-free & voice-guided digital solution developed alongside clinicians specifically for the healthcare sector. Designed to progressively transform patient safety & care, Voice-Care ensures optimal patient outcomes through the automatic prioritisation, management & recording of patient observations & clinical data from the point of care directly to the patient record in real time. With the ability to fully integrate into Trust governance systems and EPRs, Voice-Care can help to achieve greater staff satisfaction and an increase in positive patient outcomes, whilst ensuring 100% compliance with standardised processes & procedural checklists through the use of Voice-Directed Technology.

Kiosks Computers & Stands

Offering stylish, elegant & flexible solutions for mounting screens, Dakota's recommended range of Kiosk computers are designed to meet a variety of self-service applications within healthcare environments, including patient check-in, general way-finding & information purposes.

Minimising disruption to surroundings, the all-in-one Kiosk workstations are fully tamper-proof, infection-control friendly and built to last. These free-standing units are available in single or dual-screen configurations.

Keep Track of All Your Mobile Devices with Waizu Solutions

Today's NHS relies heavily on mobile devices, so knowing where they are and their battery status is critical. The Waizu Device Finder Solution equips you with the knowledge of who has which device & where, allowing you to proactively monitor device utilisation, giving the flexibility to reallocate devices to other areas of the hospital as required. Real-time battery health indicators ensure that they are fully charged, while alerts will trigger when a device needs to be placed on charge or is 'missing.'

Intelligent Cabinets from Zebra

Zebra Intelligent Cabinets allow you to optimise how healthcare mobility devices are stored, accessed, tracked & managed to harness the most efficient use of both devices & workers. Designed & developed to ensure that assets & workflows work in tandem with high performance & optimal security, the cabinets help to maximise the long-term function & lifecycle of each device through effective management, ensuring that each product is ready for use at the start of every shift, avoiding manual disruption & documentation.

eTrakLogic® for the Healthcare Supply Chain

Optimise, decarbonise & transform your fleet with the new & improved eTrakLogic ePOD solution from Dakota.

eTrakLogic is a cloud-based solution that has the ability to track any asset or item in transit, such as blood samples, specimens, assets or pharmaceuticals.

It provides pick up and proof of delivery information alongside job scheduling and management, as well as providing notifications, comprehensive dashboards and reports relating to workforces, jobs and assets.

About Dakota Healthcare

Dakota Healthcare provides true integration expertise across a broad range of healthcare applications, enabling medical professionals in over 200 NHS Trusts to understand and adopt digitalised data capture technologies.

Our fit-for-purpose solutions have been created with the efficient communication between medical professionals in mind, in addition to enhancing and enriching patient care.

We have considerable experience in deploying Patient ID systems at admission as well as point-of-care, domiciliary care, asset-tracking and inventory control solutions into leading hospital systems such as Meditech, Cerner, Dedalus (formerly Lorenzo), CliniSys (formerly Sunquest) and Epic Software.

Our relationships with industry-leading hardware manufacturers and software providers help us bring best-of-breed products and solutions to our healthcare clients, thanks to our close working relationships with framework resellers and the NHS Supply Chain.

Our ethos is to support and retain our clients through the provision of outstanding customer service.

Our value-add is our consultative approach. We offer advice and recommendations to help our clients select the right devices and technology for their specific requirements.

Our strength is the ability to offer a complete solution, enabling our clients to deal with only one supplier partner for all their data capture and printing requirements, whilst guiding them through the whole process, from product selection to implementation.

Our focus is our clients.
