

Healthcare Supplies Guide

Specialists in Labelling Solutions for Healthcare Applications

Thanks to long-standing and close working relationships with over 200 NHS Trusts and private hospital groups during our 20-year history, Dakota has the knowledge, skill and know-how required to help you source the right labelling solution to meet the unique needs and requirements of your healthcare application.

Over the years, we have developed a wide range of printing and labelling solutions which have been specifically designed to offer full integration with your internal hospital systems, including PAS, A&E, Theatre, Pharmacy, Laboratory and Asset Tracking.

As a Zebra Premier Solution Partner, we can offer competitive pricing on the complete range of Zebra Genuine Labels, while our strong relationships with alternative leading printer and label manufacturers gives us the ability to support your label printing requirements, whatever they may be.

Asset Tracking

Patient Wristbands

Patient Records

Blood Bag Labels

Pharmacy & Medication

Laboratory Specimens

Chemical Resistant

Biohazard Control

Cryogenics Labelling

ID Cards & Printers

Labels for Barcode Printers

Available in a choice of sizes, materials and adhesive options, our offering of barcode labels is compatible with commonly used thermal transfer and direct thermal printer models.

We also offer a range of pre-printed labels as well as laser labels on A4/A5 sheets.

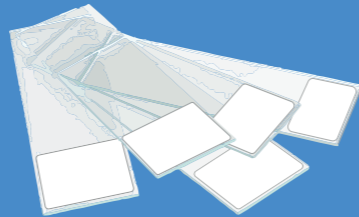

Case-Note Labelling Solution for Medical Records

Ideal for case-note labelling for medical records and available in various sizes and materials, our range of barcode printer labels is compatible with commonly used thermal transfer and direct thermal printer models. Matching thermal transfer ribbons are also available.

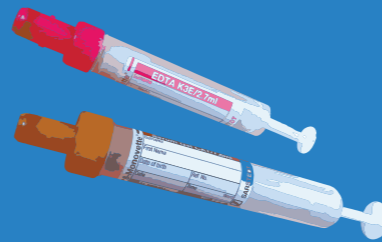

Slide Labelling for Histopathology & Cytopathology

We provide label and ribbon combinations designed to withstand harsh chemicals and disinfectants, which are available in a variety of sizes to compliment Labs Information Management Systems (LIMS).

Specimen Label Printing for Pathology

Compatible with mobile or desktop printers, we offer multiple label sizes to compliment common software systems, as well as white or coloured labels for A&E departments. Multi-part labels are also available.

Cryogenic & Freezer Labels

With the ability to stick to pre-frozen containers, our cryogenic and freezer labels come in a range of sizes and can withstand a temperature range of -196°C to +120°C.

Pharmacy Labels

Designed to complement all commonly used pharmacy systems, our range of labels offers compatibility with thermal transfer and direct thermal printers and accommodates standard pharmacy label sizes. With a choice of permanent acrylic adhesive (for non-removable labels) or peelable adhesive (for removable labels), every label can be perforated for ease of application. Matching thermal transfer ribbons are also available.

Labels for Non-Clinical Services

Chemical- and disinfectant-resistant, our GLN (Global Location Numbers) labels enable full GS1 compliance.

Success Stories

Dakota Daily Wristband Shipments Helped Keep The NHS Running During Pandemic

 Alder Hey Children's Hospital NHS Foundation Trust

Patient Admission Wristbands

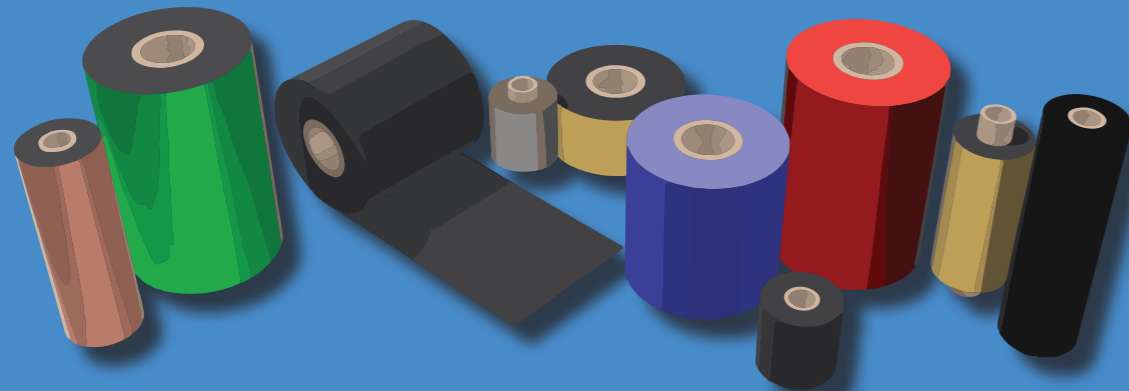

Available through NHS Supply Chain, we provide a wide variety of patient wristbands in a range of sizes, colours and materials, making them suitable for every kind of patient within any hospital department or healthcare facility.

Whether they are supplied in cartridges for wristband-specific printers or in rolls for use with desktop printers, we can help you deploy a patient wristband solution which is fully tailored to your needs whilst ensuring full compliance with current GS1 standards.

Ribbons for Thermal Printers

We offer a range of ribbons designed for compatibility with printer models from a variety of market-leading printer manufacturers and are happy to recommend the best ribbon for your specific printing requirements:

- Wax ribbons for standard printing on paper materials
- Wax/resin ribbons for resistance to chemicals on paper and synthetic materials
- Resin ribbons for durability against chemicals and heat on synthetic materials

Our Supply Chain Partners

We supply a wide range of barcode scanners and printers from a variety of market-leading manufacturers.

Annual Consumables Contracts

Thanks to our many years of working alongside the NHS, we are constantly looking to improve our service offering in order to make dealing with us as convenient and financially viable as possible.

Our Annual Consumables Contracts help to reduce delivery costs, save time and minimise the administration tasks associated with ordering mission-critical label supplies.

They are a convenient and cost-effective way to efficiently and economically manage all of your consumables purchases, from wristbands and labels to tags and ribbons.

Book Your Free of Charge Consumables Audit

Our free of charge On-Site Consumables Audit is an hour-long observation performed by one of our specialists whereby a thorough investigation of your label and printing consumables usage will be undertaken.

During the Audit, our specialist will take you through a summary of their findings and help to configure a supply plan moving forward which will benefit both you and your organisation.

Want To Know More?

Contact us today to discuss your label printing and consumables requirements or to book your **free On-Site Audit**.

About Dakota Healthcare

Dakota Healthcare provides true integration expertise across a broad range of healthcare applications, enabling medical professionals in over 200 NHS Trusts to understand and adopt digitalised data capture technologies.

Our fit-for-purpose solutions have been created with the efficient communication between medical professionals in mind, in addition to enhancing and enriching patient safety and care.

We have considerable experience in deploying solutions into leading hospital systems such as Meditech, Cerner, Dedalus (formerly Lorenzo), CliniSys (formerly Sunquest) and Epic Software.

We are fully equipped to deliver solutions, services and support within new, existing or legacy IT infrastructures which help to optimise healthcare environments whilst working effectively and seamlessly within designated time-scales.

With the ability to offer a complete solution which enables our clients to deal with only one partner for all their data capture requirements, we deliver tailored solutions to challenge and maximise our clients' requirements, working directly with them from initial analysis of processes and feasibility study, through to design, implementation, training and after sales support.

Our relationships with industry-leading hardware manufacturers and software providers help us bring best-of-breed products and solutions to our healthcare clients, thanks to our close working relationships with framework resellers and the NHS Supply Chain.

Our innovative solutions have been competitively deployed within applications such as Asset Tracking, Bedside Point-of-Care, Track and Trace, Domiciliary Care, Inventory Control and Positive Patient ID.
