

Transform Your Fleet with the New & Improved eTrakLogic® ePOD Solution from Dakota

What is eTrakLogic?

New and improved, our eTrakLogic ePOD solution has been completely transformed, making it more feature and function-rich than ever before. Developed for the manufacturing supply chain, eTrakLogic is a cloud-based solution that has the ability to track any asset or item in transit.

It provides pick up and proof of delivery information alongside job scheduling and management, as well as notifications, comprehensive dashboards and reports relating to workforces, jobs and assets.

Manufacturing & Logistics

Dramatically reduce asset tracking errors and customer service issues whilst achieving cost savings, improved efficiency and enhanced customer satisfaction.
