

## Controlled Access Solutions for Healthcare and the Manufacturing Supply Chain

Fast, secure access that powers **productivity** in shared environments

The Imprivata solution is purpose-built for industries where shared devices, speed and security are mission critical. It eliminates login friction, strengthens security and helps organisations to drive better outcomes.

### The **Imprivata** Advantage:

#### Fast User Switching

Tap badge or use biometrics to instantly access your session and applications.

- Reduces login time from minutes to seconds

#### Shared Device Access

Secure, seamless access for multiple users on shared workstations and devices.

- No shared passwords
- Automatic session locking & faster user switching

#### Strong Security & Compliance

Enforce strong authentication and identity policies with complete visibility and audit.

- Reduce risk & protect sensitive data
- Meet regulatory & audit requirements

### Proven **Business Impact**:

**90%**

Faster Logins

**30%+**

Productivity Gain

**70%**

Fewer Password Reset Requests

**100%**

Audit and Compliance Confidence

### Built for **Healthcare & the Manufacturing Supply Chain**:

#### Healthcare

Prevent credentials being shared with single permission authorised access; remove security risks with improved privacy and compliance controls

#### Emergency Care

Give medical staff secure access to critical systems when every second counts, whilst controlling which parts of the system they are allowed to access

#### Manufacturing

Enable secure access on shared terminals across the shop floor and in control rooms to keep operations running

#### Warehousing & Distribution

Protect production line equipment from unauthorised access by third party vendors and ensure they are unable to access production data

## Users Struggling?

### Too many logins. Too many hurdles.

- › Why do I need to verify again? I'm already logged in!
- › I need access now - this is slowing me down
- › Another code? I just want to do my job
- › Too many prompts; access delayed; productivity impacted
- › We need to do our jobs without delays

## What Users Need:

### Strong security. Fast access. Zero compromise.

- › Users need fast access
- › Patient care – seconds matter
- › Public safety – real-time access saves lives
- › Production – downtime is costly
- › Field & remote work - work anywhere, stay productive

## Business Requirements:

**Strengthen Security,**  
reduce risk, ensure compliance and improve operational efficiency

**Drive Productivity,**  
standardise processes and reduce friction across the business

**Simplify Management**  
of shared devices and improve user experience

**Lower Total Cost**  
of ownership and deliver measurable business value

## How Imprivata Helps:

### Imprivata Benefits:

- › **Right access at the right time** – adaptive authentication based on user, device, location & risk
- › **Fewer prompts, less friction** – faster access for frontline users – no unnecessary interruptions
- › **Stronger security, lower risk** – enforce policies consistently & reduce exposure
- › **Greater visibility & control** – monitor access, detect risk & respond in real-time
- › **Simple for users, easy for IT** – seamless experience with centralised management
- › **Ubiquitous access** - one consistent experience across all devices & operating systems

## Imprivata Quick Ref Info:

### By Objective:

- › Move to passwordless authentication
- › Access shared devices & kiosks
- › Deploy shared mobile devices
- › Control third-party access
- › Address cyber insurance requirements
- › Improve workflows & protect privacy
- › Strengthen compliance
- › Face authentication & identity verification

### Core Capabilities:

- › Single sign-on
- › Multifactor authentication
- › Mobile access
- › User behaviour & access analytics
- › Privileged access management
- › Third party access management
- › Remote support
- › Identity threat detection & response
